

Managed services

WE DELIVER CROWD TESTING AS AN ENTERPRISE-GRADE PROFESSIONAL MANAGED SERVICE

Our Test Managers closely monitor your test progress and coverage and provide necessary guidance and support to the testers.

We manage the crowd with the ownership to achieve the targeted test coverage and take accountability to deliver quality outcomes. We review and validate every defect and test result, and reject invalid issues and duplicates to eliminate unnecessary noise before submitting our deliverables to you. We are responsible for completing deliverables within the agreed fixed budget. We can integrate crowd delivery with testing performed by client staff and our onsite consultants. The following factors differentiate our services from other providers:

SERVICE GUARANTEE

50% cost savings compared to traditional testing

2x the speed compared to traditional testing

100% increase in test coverage, device coverage and defect detection

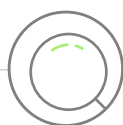

In the unlikely event that value for money is not received, we will provide additional services, free of charge, to address the gaps
